

PERAMAN T

Software Developer | Python • Django • Flask • REST APIs
Chennai, India | +91 8778052345 | peramanp97@gmail.com

PROFESSIONAL SUMMARY

Results-driven Software Developer with 4+ years of experience building and maintaining scalable web applications using Python, Django, and Flask. Proven track record of designing RESTful APIs, optimizing database performance, and delivering high-quality thorough code reviews and testing. Adept at collaborating with cross-functional teams to translate business requirements into robust technical solutions.

TECHNICAL SKILLS

Programming Languages	Python
Frameworks	Django, Flask, Django REST Framework (DRF)
Frontend	HTML, CSS, Bootstrap
Scripting Language	JavaScript, Ajax, jQuery
Databases	PostgreSQL, MySQL
Tools & Platforms	Postman, VS Code, PyCharm, Jira, Git

WORK EXPERIENCE

N-Tier Business Solution Pvt. Ltd [December 2022 – July 2026]

Role - Software Engineer

Project : Alpha Prod | Client : Elegen

Application : Biotechnology platform for Elegen, focused on manufacturing synthetic DNA for research organizations and pharmaceutical companies, enabling production of complex DNA sequences for gene therapy and vaccine development.

Responsibilities:

- Designed and implemented responsive web interfaces using HTML5, CSS3, and JavaScript (AJAX).
- Generated reports in PDF, Excel, and CSV formats using Pandas and Django utilities.
- Conducted code reviews, debugging, and unit testing to maintain high code quality standards.
- Collaborated with stakeholders to gather requirements and translate them into technical specifications.
- Designed and implemented MySQL data models, ensuring data integrity and consistency.
- Documented development processes, technical specifications, and user guides for effective knowledge transfer.

Project: *E-COM* | **Client:** *Elegen*

Application: The Ecom OrderInfo Portal is an internal web application for managing and tracking customer orders throughout the fulfillment process. It integrates with backend systems to provide real-time visibility into order status, shipment tracking, and inventory information.

Responsibilities:

- Built and maintained RESTful APIs using Django REST Framework (DRF) to enable seamless frontend-backend communication.
- Designed custom serializers, views, and routers to handle complex business logic and data transformations.
- Implemented authentication and authorization systems using JWT and OAuth2.
- Integrated third-party APIs and services with robust error handling and response normalization.

GR Facilities Pvt. Ltd [September 2021 – November 2022]

Role - Junior Web Developer

Project : *RIMS* | **Client :** *Rela Hospital*

Application: Healthcare Information System that focuses mainly on the administrative needs of hospital, and it is an integrated information system which is designed to manage all the aspects of hospital's operation such as Medical, Patients, Purchase Information and Financial Operations.

Responsibilities:

- Integrated RESTful APIs for seamless data exchange with third-party services and external platforms.
- Developed an appointment scheduling module with calendar booking and automated email/SMS notifications.
- Built a billing and invoicing module with automated PDF generation.
- Managed complex database operations efficiently using Django ORM.
- Applied OOP principles and Python libraries for optimized performance and business logic.
- Connected APIs with external services including payment gateways, cloud storage, and third-party applications.
- Contributed across the full software development lifecycle, from design and development through deployment and post-launch support.

EDUCATION

Master of Computer Applications (MCA) | Periyar University | 2020

B.Sc. in Computer Science | Periyar University | 2017

CERTIFICATION

- Completed **Python** Course at. TestLeaf, Chennai
